

HUGO LEARN THEME

[Hugo-theme-learn](#) is a theme for [Hugo](#), a fast and modern static website engine written in Go. Where Hugo is often used for blogs, this multilingual-ready theme is **fully designed for documentation**.

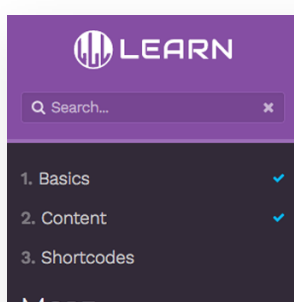

This theme is a partial porting of the [Learn theme](#) of [Grav](#), a modern flat-file CMS written in PHP.

! Tip

Learn theme works with a *page tree structure* to organize content : All contents are pages, which belong to other pages. [read more about this](#)

Main features

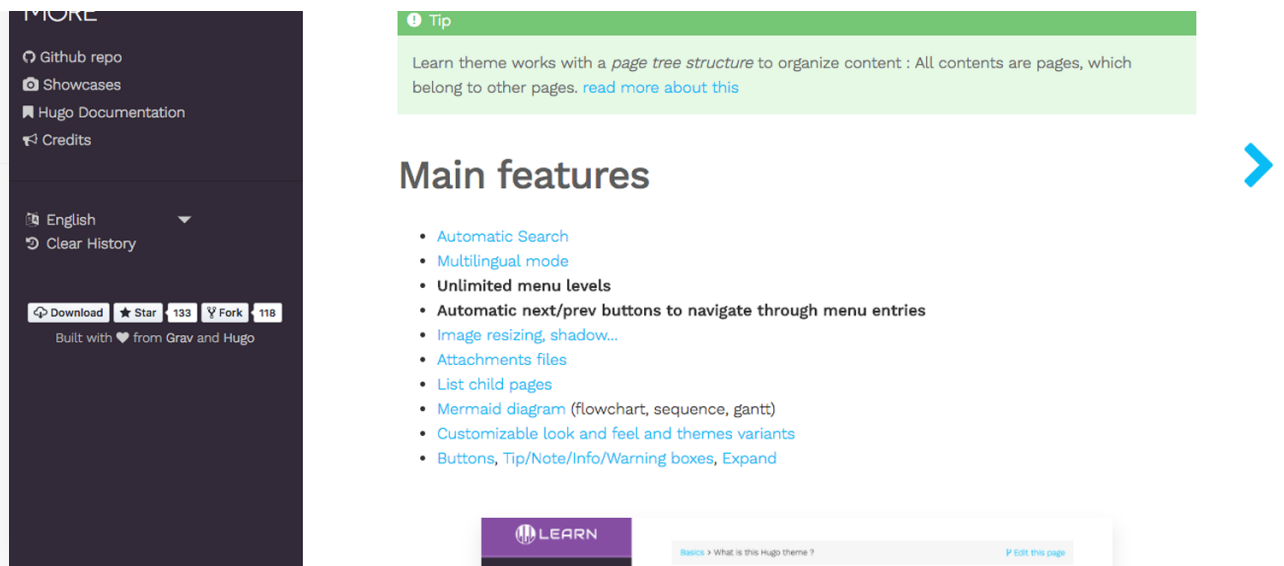

- [Automatic Search](#)
- [Multilingual mode](#)
- **Unlimited menu levels**
- **Automatic next/prev buttons to navigate through menu entries**
- [Image resizing, shadow...](#)
- [Attachments files](#)
- [List child pages](#)
- [Mermaid diagram](#) (flowchart, sequence, gantt)
- [Customizable look and feel and themes variants](#)
- [Buttons, Tip/Note/Info/Warning boxes, Expand](#)
